2-30	Koi	Tissue	Negative

Tissue homogenate was inoculated onto susceptible cell cultures and observed for cytopathic effects (CPE) for one week. Cultures negative for CPE were passaged onto fresh cell monolayers and observed for CPE for another week. A Negative result indicates no CPE was observed in both passages. This procedure conforms to OIE requirements for international trade.

Comment: Sample collected from ponds:16 (sample 11-15),19 (6-10), 20(1-5), 22(16-20), 33 (21-25), 29 (26-30); water temp:10 C
